

Success stories: OrganOx

The business

-  OrganOx
-  Oxford (UK)
-  OrganOx is a medtech company that developed the metra, a groundbreaking device that is predicted to dramatically increase the number of livers that can be safely used for transplantation.
-  The metra stores organs at normal body temperatures for extended periods of time, enabling an assessment of function before transplant.

The funding

£3m growth loan

Use of funds:

- Drive adoption of the metra
- Enter new markets

2008

OrganOx founded

OrganOx completes £6.4m equity fundraising

OrganOx
living organs for life

"Growth Lending moved quickly to gain an understanding of OrganOx's business model and its funding needs, and to tailor an appropriate package for us. The overall speed of response and execution was impressive."

Robin Abeyesinhe, Finance Director

"We invest in a business when we believe in the management team and its vision for the future. OrganOx ticks all of those boxes, so we're excited to join the company on its growth journey in the coming years."

Kim Martin, Managing Director
